

## C-CHANGE RESIDENT SURVEY

Leaders in residency training have recently recognized the critical role that the culture or clinical learning environment plays in the training of physicians, physician well-being, and the provision of safe, high quality patient care. The C-Change Resident Survey<sup>®</sup> assesses the clinical learning environment and the culture of professionalism from the perspective of resident physicians. The survey aligns with the ACGME Pathway.

The C-Change Resident Survey, with demonstrated evidence of validity in U.S. residency programs nationally, assesses 16 dimensions of the culture: Vitality; Relationships, Inclusion, Trust; Self-Efficacy in Career Advancement; Values Alignment; Ethical-Moral Distress; Institutional Support; Respect; Mentoring; Gender Equity; Minority Equity; Work-Life Integration; Leadership Aspirations; Competencies; Valuing Diversity: Attitudes and Behaviors; Antisexism and Antiracism Skills; and Change Agency for Equity. In addition to documenting the culture of residency programs, the survey is a credible and powerful tool for facilitating improvement. The C-Change Resident Survey can be used to:

- Document the environment for learning and professionalism of residents
- Program evaluation
- Examine associations among resident perceptions of the organizational culture and demographic characteristics such as gender, ethnicity and race, and year of residency training, program specialty and site
- Assess inclusive excellence; Assess diversity needs
- Assess the effectiveness of programmatic interventions/changes
- Identify dimensions of culture requiring improvement
- Address well-being
- Initiate change activities for improvement

### Services

The C-Change Resident Survey is offered on an institution-by-institution basis to best fit the needs of residency programs, GME and hospitals. The C-Change research team has developed a streamlined process to manage survey data collection, analysis, and reporting.

Services provided include:

- Consultation on institutional needs
- Customization of the C-Change Resident Survey for the projects and residency program
- Drafting announcements and cover communications
- Survey administration
- Reminders to achieve high response rates
- Management of e-mail communications with respondents
- Confidential data collection and storage
- Data analysis
- Reporting: summary report; detailed item report; scorecard
- Comparison with national benchmark data

## BUDGET FOR C-CHANGE SERVICES

	Base cost, up to 10 residents	Additional cost per resident, 11 to 50 residents	Additional cost per resident, more than 50 residents
<b>Single Residency Training Program</b>			
Single administration*	\$5,000	\$25	\$20
Administration of the CRS <sup>†</sup> twice (pre – post design) with analysis and report tracking change over time	\$9,500	\$25	\$20
<b>Multiple Residency Training Programs (2 – 4 programs) at One Site</b>			
Single Administration	\$7,500	\$25	\$20
Administration of the CRS twice (pre – post design) with analysis and report tracking change over time	\$13,000	\$25	\$20
<b>Multiple Residency Training Programs (2 – 4 programs) at Multiple Sites (2 – 4 sites)</b>			
Single administration	TBD	\$25	\$20
Administration of the CRS twice (pre – post design) with analysis and report tracking change over time	TBD	\$25	\$20

<sup>†</sup>CRS indicates C-Change Resident Survey

### Project minimum: \$12,350

#### Optional additional services:

- On-site presentation of the C-Change Resident Survey findings
- Collection of open-ended narrative responses
- Design of tailored change activities/workshops/programs

Assessing the Culture of Residency Using the C - Change Resident Survey: Validity Evidence in 34 U.S. Residency Programs. Pololi L, Evans A, Civian J, Shea S, Brennan R. J General Internal Medicine. 2017;32:783-789. doi:10.1007/s11606-017-4038-6.
